**T**HE PUBLISHERS take pleasure in presenting herewith the Eighth Annual Edition of Henderson's Moose Jaw Directory. A work of this kind to be valuable must, in all respects, be thoroughly reliable and up-to-date; fully conscious of these essentials, the publishers have taken every precaution to secure accuracy of information.

The Edition embraces the area of GREATER MOOSE JAW, comprising the territory of the city proper and all adjoining subdivisions.

Attention is directed to the Miscellaneous Section in the front part of the volume, containing up-to-date statistics and information, much of which is not to be found elsewhere in print.

The Advertising Section, together with the Classified Directory, contains a complete alphabetically arranged list of all articles manufactured and sold in Moose Jaw, which forms a most efficient wholesale and retail buyer's guide.

The value of the street section is often unappreciated by some who desire to find a certain house on a street unfamiliar to them to the extent it should be. By application of the following example the location of any street number can be found expeditiously: Suppose 246 Athabasca Street East is wanted: refer to street section Athabasca Street East—glance down to 246, then to the nearest intersection to 246. It will be found that this number is on the north side of the street, four houses east of 2nd Avenue N.E., between 2nd and 3rd Avenues N.E.

## ADVERTISING MOOSE JAW

The Moose Jaw Directory is placed in Directory and Public Libraries throughout the United States and Canada, where it serves the public as a valuable book of reference and the City it represents as a splendid standing advertisement, for no other publication can convey such an idea of the City, its business interests and all its various institutions and organizations. Few people realize how this publicity affords Moose Jaw and its industries.

The Publishers desire to thank their patrons and the general public for the courtesy extended at all times to their representatives, and to say that they fully appreciate the confidence which the business and professional men of Moose Jaw have always shown in their publications.

# City of Moose Jaw

## PART I.

### Descriptive Review

Moose Jaw occupies a commanding position in almost the geographic centre of the great Canadian Prairies, served by all the trans-continental roads, and having an exclusive territory in the south-western part of the province which has proven lately to be capable of miraculous production in grain crops, though known only a dozen years ago as "the great dry belt." Through merit alone she has attained an enviable position among the cities of the west, as this has always been a city which scorned to use the usual methods of "pull."

When the great western provinces began their remarkable era of expansion, Moose Jaw was a small railroad town—in 1901 she boasted 1,500 people. As the great hinterland developed, the population and institutions piled up with ever-increasing rapidity. In 1906 the population was 6,300, in 1911 it totalled 13,000, and in 1914 nearly 30,000. This was a high water mark. A generous slice of the population of the city is at the time of writing in Flanders or in the different stages of preparation to take the battlefield, and the number recruited represents just about Moose Jaw's shrinkage from normal population.

The enormous increase of wheat production in the district which can be considered as strictly tributary to Moose Jaw has been one of the wonders of the wonderful Western Canada. Seven years ago, when the Robin Hood Mills considered Moose Jaw as a manufacturing point, a survey was made of the district, and it was considered that they could count on three million bushels per annum. In the year 1915 the same territory from which the smaller amount was expected, produced over sixty million bushels, and only a very small part of it cultivated, at that.

The farming population in the territory over which Moose Jaw holds commercial sway, through successful crops and high prices, has become very prosperous, reaping a much greater share than has been the average lot of the city dweller. This prosperity will inevitably in part be transferred to the city in return for the more modern comforts of living, and its influence has been remarkably felt during the season of 1917.

### Moose Jaw's Industries

The principal industry of the city is the group of factories grouped under the name of the Robin Hood Mills. There are eight in all, the three greatest being the production of flour, oatmeal and porridge wheat. The capacity of the plant is 2,500 barrels of flour, 2,000 cases

of oatmeal, and other products in proportion. The firm controlling these factories has become very prosperous, and have now a branch mill in Calgary.

One of the largest packing plants in Western Canada is located in Moose Jaw. It is the property of Gordon, Ironside & Fares, and has been increased five hundred per cent. in capacity in four years. Thousands of animals are slaughtered here in a day, and the finished articles supplied to all the cities and towns of the province.

The Saskatchewan Bridge and Iron Company, primarily organized for the fabrication of structural steel and such products, has been for many months running twenty-four hours a day, seven days a week, on munitions of war, employing nearly two hundred men in the many processes of shell making. They will revert to the original line of business when the war is over, and it is believed the company will be employing one thousand men before the end of 1917.

The Dominion Fire Brick and Clay Products Company, whose plant is located about 35 miles south of the city, are entirely a Moose Jaw concern. This company controls the only fire clay deposit in Canada with the exception of a shewing near Vancouver. The plant is now turning out 20,000 a day, and intend to double their capacity in the spring of 1918. The fire brick of this company has been shown by exhaustive tests to be equal to the highest grades of imported refractory brick, and they are now being used almost exclusively in the western provinces.

Many smaller factories are located in the city.

### **Railway Facilities**

The grand divisional point of the Canadian Pacific Railway was established in Moose Jaw over six years ago. All the lines of that road are administered from this city, there being several superintendents under the oversight of a general superintendent. The C. P. R. has an investment of well over \$5,000,000 in Moose Jaw, employs considerably over two thousand men, has a payroll of about a quarter of a million a month, and has here the third largest individually owned railroad yards in the world, there being upwards of seventy miles of trackage.

The Canadian Northern Railway has now had a terminal of their Radville and Gravelburg lines in the city for about three years. These two lines are said to be the best paying branch lines on the C. N. R. system. The company intend in the very near future to complete their entrance to the city by the overhead route (now partly completed) and if running arrangements are made with the G. T. P. to Regina (said to be a certainty), it will round out a very complete railroad service by this road in three directions.

The Grand Trunk Pacific has erected a temporary station at the north end of Main Street. They also run a line to the northwest as far as the river.

## General Appearance

Absolutely the most modern equipment has been used by Moose Jaw in her paving, sidewalk and lighting program, and the finished and attractive appearance strikes the casual visitor as ideal. All telephone and light wires have been kept off the business streets. The cost to the community has been considerable, but the satisfaction has been greater.

## City Facilities

Moose Jaw has a splendid street railway system, operating nearly twenty miles of trackage, covering all the business and residential sections fairly thoroughly. Other extensions are in view, but expansion of this kind is naturally held up owing to war conditions. The company runs a good summer service to Kingsway Park, which is much appreciated by the citizens.

The quality of Moose Jaw's domestic water supply is a matter of considerable pride. It is piped for a distance of twenty-two miles from the Sandy Creek district, and is all pumped out of the gravel beds in that locality. The water is very pure, as proven by the fact that up to September 1st, 1916, not a single case of typhoid was reported in the city.

The system of sewage disposal is the most modern known in the world, and is visited many times annually by delegations from other localities who wish to imitate.

There are almost two hundred acres of parks belonging to the city within the incorporated limits. Most of these are well treed, and several have splendid athletic and recreation grounds, which are extensively used by the younger people and athletic organizations.

The educational facilities of Moose Jaw, especially up to the point of higher college equipment, is unsurpassed anywhere. There are ten schools, some of the larger ones costing from \$110,000 up to \$150,000, equipped with the latest apparatus for domestic science and training in the well-known constructive trades.

## Board of Trade

Moose Jaw's Board of Trade is a live business organization, which has been prominent and active in all public movements. The president is Mr. John Crawford and the commissioner Mr. Hugh McKellar.

### **MOOSE JAW COLLEGE**

This is a Residential College for young men and boys of all ages, and opened for the admission of students on September 10th, 1913. The institution has been organized by the Synod of Saskatchewan of the Presbyterian Church, but is non-sectarian. Students are admitted at any time during the term, and their fees are proportionate for the time spent. The new buildings are situated on the top of College Hill overlooking the city on a site of forty-five acres. It is intended to erect the Ladies' College as soon as possible. The college grounds are bounded by 7th Avenue Southeast, Coteau Street, 9th Avenue Southeast and the Canadian Pacific Railway, and are on the east side of the Moose River adjoining River Park.

# University of Saskatchewan

(Saskatoon)

The University is situated on the east side of the south branch of the Saskatchewan river. Its site comprises 1,333 acres. About 300 acres, with frontage of over half a mile on the river, have been set apart for a campus. A portion of the quarter section south of the campus is devoted to plot work, the land being virgin prairie.

The College building is about 220 feet long and 52 feet wide with wings of about 111 feet in length and 30 in width. At the rear is a large hall capable of seating between 500 and 600 people. This building will be used for teaching purposes in Arts and Agriculture. It is located in a position convenient to the Agricultural, Engineering, Horticultural and Dairy buildings, the Stock Pavilion and Farm buildings so that in time it may be devoted exclusively to the College of Agriculture. Near it are placed the residences for students.

## COLLEGE OF AGRICULTURE

The College of Agriculture is a part of the University and stands in the same relation to the University as does the College of Arts and Science. It has a number of buildings planned and equipped for carrying on its particular work and a staff of its own for the purpose of giving instruction especially in the technical subjects and elementary work in English, Mathematics and Sciences. Its laboratories and equipment are under certain limitations and restrictions, available to students in the other colleges of the University for the purpose of scientific research.

The aim of the College is to give the students under its care a good, practical training in the different technical subjects that bear upon the various phases of agriculture, such as animal husbandry, field husbandry, farm mechanics, farm engineering, dairying, horticulture, tree planting and others; to give them a good, liberal education in various other branches such as will enable them to adapt themselves readily, without great loss of time and energy, to new and varied conditions, and to fit them for their duties as good citizens.

The University estate consists of the campus, about 293 acres, and the College Farm, 1,040 acres. The College Farm proper consists of 880 acres.
